Long-Acting vs Immediate-Release Stimulants at a Glance

HOPE

Immediate-Release

- Acts in about 30 minutes
- Wears off in about four hours
- Taken two or three times a day

Long-Acting Examples

- Vyvanse, a slow-converting prodrug
- Adderall XR and Focalin XR beads
- Concerta osmotic tablet

HOPE

The Benefits

- No mid-day gaps
- Less rebound irritability
- Easier to take consistently
